

Match rules are tuned to eliminate false positives, while matching at least 90% of all probable matches.

34/8000

Number of complex match rules and data points each match request is processed through. Rules and complexity is increasing daily as we fine tune the logic.

Match real time with integrated 3rd parties or start a batch job to match two lists using the UI console.

Match Rules

Company Suffix

Ignore common company suffix such as Inc, Corp, LLC

Web Domain

A record with missing company name, but valid business domain is matched

Special Characters

"&" is same as "AND". Ignore comma and other special characters

Company Mergers

Youtube matches with Google and Taleo matches with Oracle

Acronyms

IBM is same as "International Business Machine" and same as I.B.M

Popular Names

Alphabet Inc and Google are same while matching

Geo Sensitivity

In case of multiple matches, geographical proximity is given preference

Custom Rules

Rules are never enough! Create your own white list and blacklist to match against.
